

# Chinatown Energy Literacy Campaign | 華埠能源文化認知運動

Climable | Chinatown CLT 華埠土地信託會 | Chinatown Power, Inc. 華埠主導能源

## TODAY'S PROBLEMS 今天的問題

Energy Resilience / 能源彈性

Climate and Open Space / 氣候和開放空間

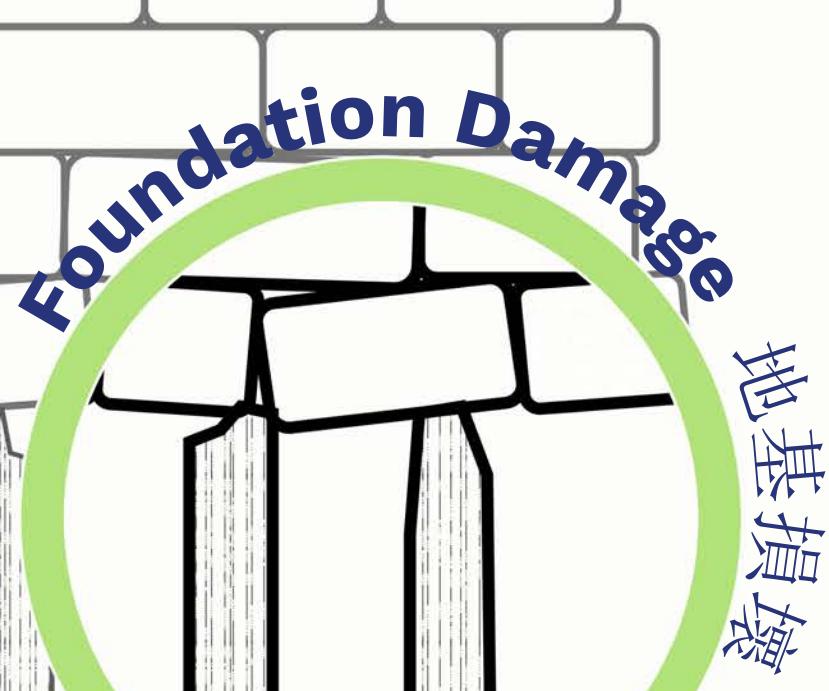

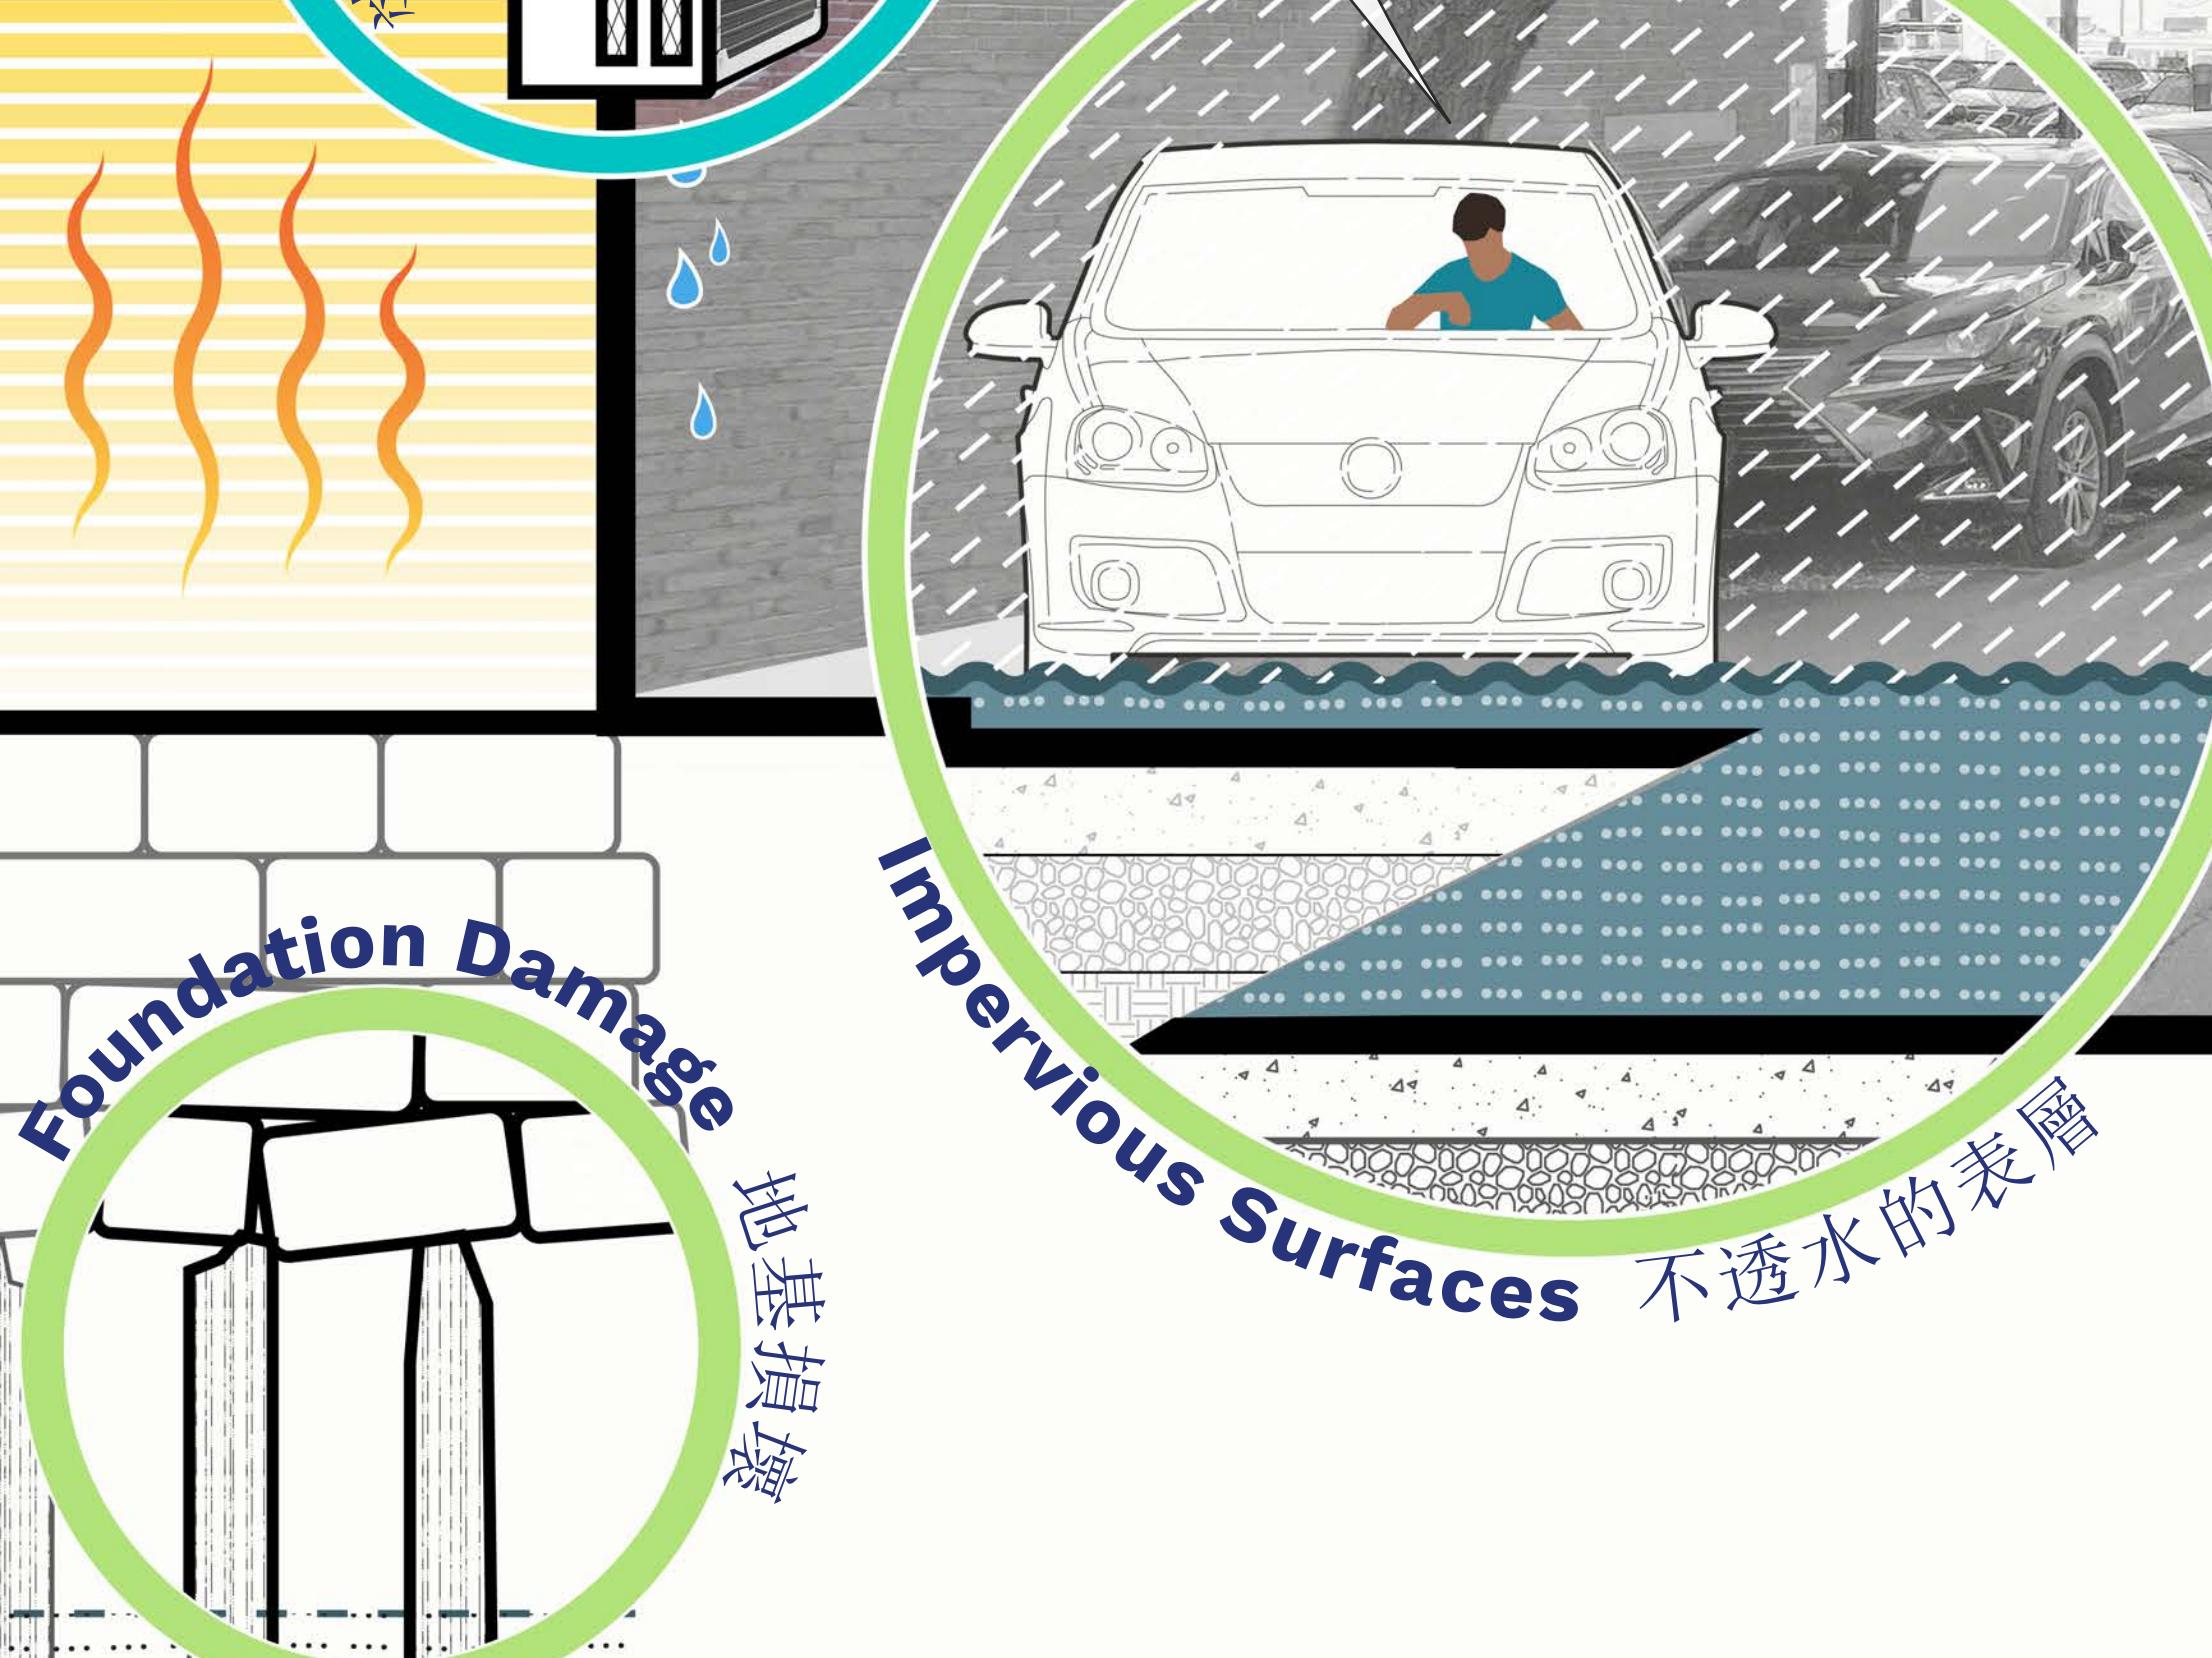

Extreme weather happens more frequently now due to climate change and sea level rise. It cuts off power and causes damage above and below ground.

由於氣候變化和海平面上升，現在極端的氣候發生得更頻繁。它會切斷電源並造成地上和地下的損壞。

Hi, Mrs. Chan, I don't understand my electricity bill. It keeps getting more expensive!

您好！陳女士，我不明白我的電費單為何越來越貴了！

Haven't you heard, Mr. Wong? We're planning on setting up a microgrid! It will use on-site batteries and solar panels to create and store power. We can switch on and off the grid to lower electricity bills.

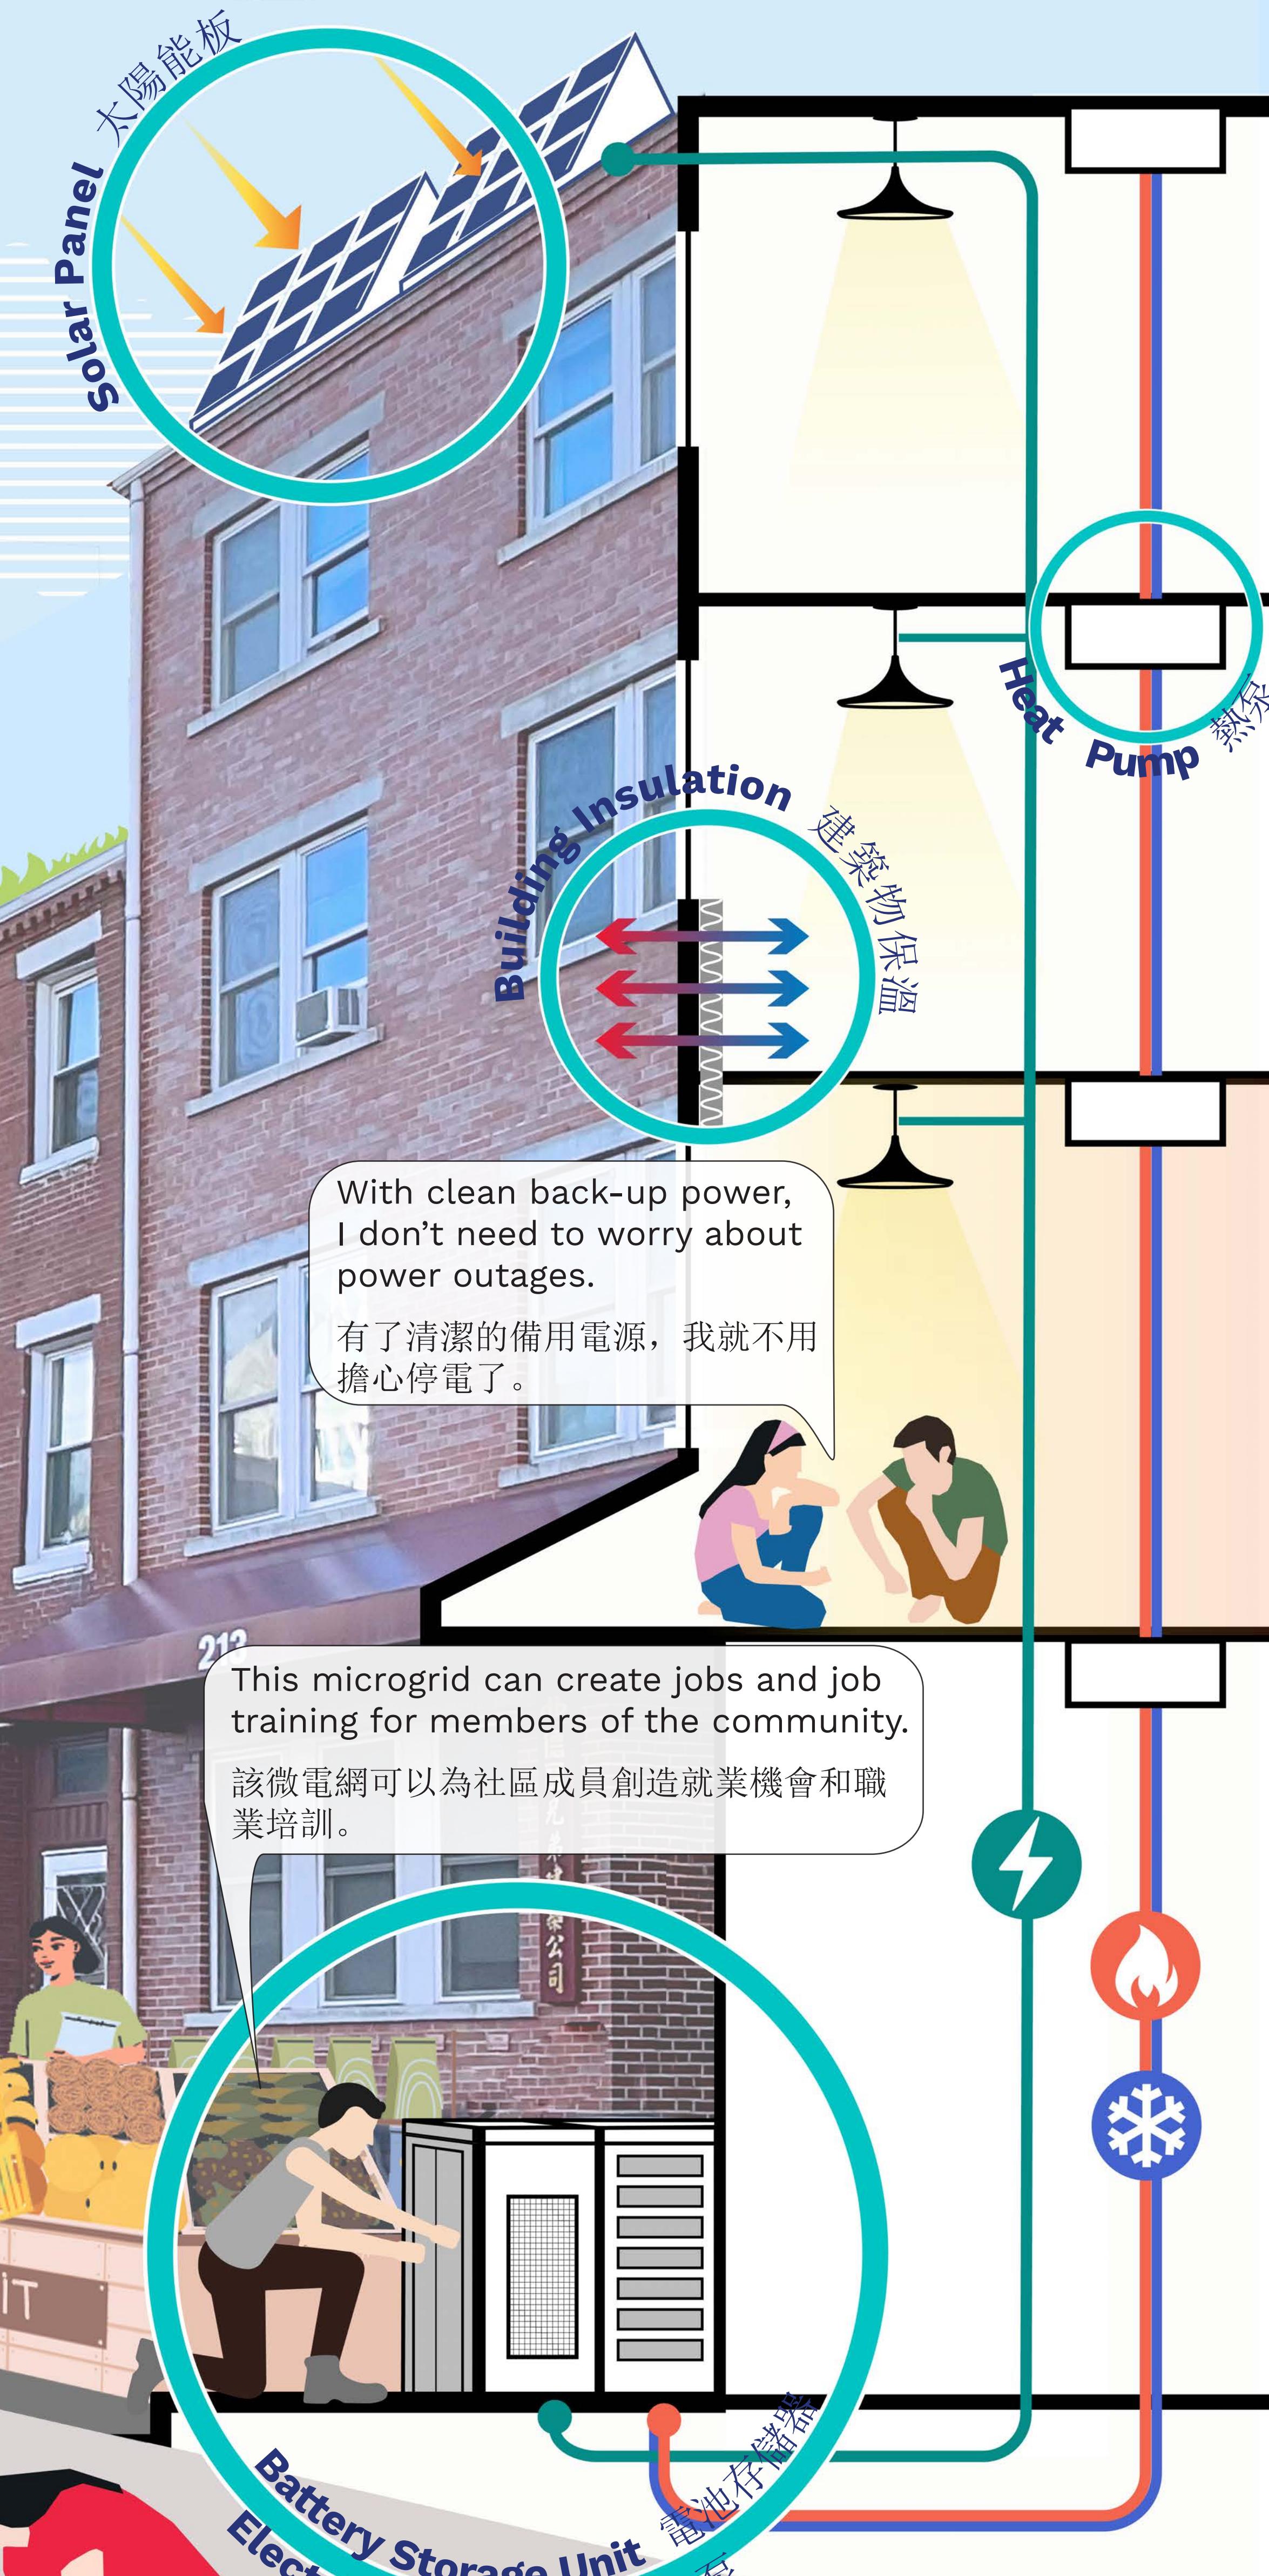

黃先生，你沒聽說嗎？我們正計劃建立一個微電網！它將使用就地的電池和太陽能電池板來產生和存儲電力。我們可以開啟和關閉電網以降低電費。

We need to advocate for more quality open space for the community to gather outside!

我們需要為社區提供更多優質的戶外聚集空間而倡議！

## TOMORROW'S SOLUTIONS 明天的解決方案

With clean back-up power, I don't need to worry about power outages.

有了清潔的備用電源，我就不用擔心停電了。

This microgrid can create jobs and job training for members of the community.

該微電網可以為社區成員創造就業機會和職業培訓。

The community gardens run by residents are important for the community's health.

由居民管理的社區花園對於社區的健康很重要。

This graphic is part of a clean energy literacy campaign tailored to Chinatown, created by the Chinatown Community Land Trust, Chinatown Power, Inc., the Sasaki Foundation, and Climable. The campaign complements ongoing work on a community-owned, clean energy microgrid. This graphic shows the environmental problems that Chinatown faces today on the left, and the associated solutions that a microgrid can provide on the right. The clean energy literacy campaign also includes informational graphics on various relevant topics for Chinatown, such as energy affordability, environmental justice, and public health. These materials can be found on ChinatownPower.com, on Chinatown Power's social media accounts, and distributed on WeChat.
